Food Ordering App

Color Picker

Technology Used

HTML,CSS and JS

HTML,Tainwind
CSS,ReactJS,Redux,Firebase,
React Router

HTML,CSS,JS

Abstract

It's a portfolio website containing my other work's link on the work page. It has only front end section.

ReactJS food ordering app.Using this user can find category wise food, search food and can add to the cart.But they can not checkout if they are not logged in.Here login system and data storage both are done with the help of firebase.

User can generate a random color, can save it as custom colors, can choose a color from custom colors and can copy the color code in HEX or in RGB format. User also can upload image as background .
